### Ingredients:

Fish meal, wheat flour, gelatin, fish oil, spirulina, alfalfa meal, mineral / vitamin premix, soya oil, potassium chloride, yeast, xanthan gum, taurine, lutein, astaxanthin.

# AQUATIC OMNIVORE GEL

### Feeding & Storage Guide:

Mix with an appropriate amount of hot water (>95°C), blend with a spoon for one minute and pour into a flat cool tray. Chill overnight in a refrigerator. Cut gel by hand or processor to obtain appropriate size for the fish.

Product is designed to be mixed with water at a proportion of (by weight) 50:50. This mixing ratio may be altered to change the gel's consistency.

Store in a cool dry place and fold down top when not in use . The dry powder is shelf stable for 6 months. Once mixed treat as you would fresh fish, i.e keep for up to 3 days in a refrigerator if kept clean and shrink wrapped.

Will keep frozen for 6 months providing it is not repeatedly taken out and thawed for use.

Vitamins guaranteed until the best before date shown together with the batch code on the back of the jar.
