

Brewer's Yeast

High-protein feed supplement

Brewers' Yeast BT from Leiber is recommended for animals with high nutritional demand. It is well tried and tested and has been seen to prevent digestive disorders especially in the intestinal region. It naturally strengthens the body's defenses. It is of particular use in one-sided feeding (compound feed and hay), where there are dietary deficiencies (especially during stable keeping) and where there are rations with a high microbial load (usually home-grown feed such as hay and oats). During periods of stress and high physical strain such as competitions, transport and feed change, Brewers' Yeast BT decreases anxiety and nervousness

- It has a high concentration of dietary and prebiotic ingredients (brewers' yeast and grains) that restore the balance of intestinal microflora, thereby reducing the susceptibility for gastrointestinal disorders.
- Excellent effect on reproductive and fertility performance and moulting. Brewers' Yeast BT stabilizes the animal's constitution during the breeding season and reproductive cycle.
- Natural content of high grade amino acids, fatty acids, B-vitamins, enzymes and trace elements that are a valuable addition to feed rations.
- Helps to prevent hoof damage, rough coat, dental problems, susceptibility to disease and reduced performance.
- Brewers' Yeast BT enhances the overall digestibility of the ration.
- The low temperature drying with brewers' grains in Leiber Brewers' Yeast BT leaves the sensitive bioactive compounds and the biological efficacy of brewers' yeast intact.

Analyses per kg:

Crude Protein:	31 %	Sodium:	0,1 %	Vitamin B ₆ :	22 mg
Crude Fat:	7 %	Lysine:	1,8 %	Choline:	2300 mg
Crude Fiber:	9,5 %	Methionine:	0,6 %	Niacin:	240 mg
Crude ash:	6,5 %	Met + Cys:	1,2 %	Pantothenic Acid:	73 mg
Starch:	5,0 %	Threonine:	1,4 %	Folic Acid:	12 mg
Sugar:	1,0 %	Energy:	12,0 MJ	Biotin:	520 mcg
Calcium:	0,3%	Vitamin B ₁ :	90 mg	Iron:	320 mg
Phosphorus:	1,0 %	Vitamin B ₂ :	18 mg	Selenium:	500 mcg

Ingredients:

Brewer's dried grains 60%
Brewer's yeast (*Saccharomyces cerevisiae*) 40%

Dosage:

3-5 % of the daily food intake

Packaging:

25 kg bag
