

# Vitamin E + selenium

## Feed Supplement for Animals

Fight free radicals with Vitamin E with Selenium, a premium antioxidant that defends cell membranes from damage. An animal needs Vitamin E. It supports the nerves, eyes, muscles, tissues, skin and more—and it is essential to healthy aging, weight management and blood vessel integrity. In addition to this, Vitamin E improves the body's use of Vitamin A and protects essential fatty acids. Vitamin E interacts extensively with and is impacted positively by Selenium. Selenium deficiency can lead to health concerns due to free radical damage and low immune function.

### Analyses per kg:

Moisture:	76,48 g/kg	Potassium:	7,55 g/kg	Choline Chloride:	438,15 mg/kg
Crude Protein:	88,18 g/kg	Sodium:	0,97 g/kg	Vitamin E:	20.000 mg/kg
Crude Fat:	34,76 g/kg	Chlorine:	0,17 g/kg	Total Iron:	250,23 mg/kg
Crude Fiber:	35,82 g/kg	Sulfur:	0,80 mg/kg	Total Manganese:	63,38 mg/kg
Starch:	176,36 g/kg	Lysine:	3,53 g/kg	Total Copper:	15,48 mg/kg
Calcium:	152,00 g/kg	Methionine:	1,41 g/kg	Total Zinc:	46,85 mg/kg
Phosphorus:	5,40 g/kg	Met + Cys:	3,26 g/kg	Total Cobalt:	0,06 mg/kg
Ca/P ratio:	28:1	Threonine:	2,91 g/kg	Total Selenium:	60,00 mg/kg
Magnesium:	9,25 g/kg	Thryptophan:	1,23 g/kg		

### Dosage:

0,3% of the daily food intake = 3 g per kg

### Packaging:

4 kg bucket
