

FMA Fruit-Mix-Additive

Vitamins, minerals for fructivores

Product: **FMA - Fruit-Mix-Additive**

Product form: Premix for fructivores.

Mixing percentage: 1,00%

Description: FMA – Fruit-Mix-Additive is a vitamin – mineral additive specially made for the fructivores birds. The main diet of our fructivores birds are a mix of soft food and a mix of fresh fruit e.g. apple, papaya, mango, cactus fruit, berries as well as one a week a small part of orange. Banana could fatten your birds, so do not supply banana at a daily basis. To avoid moulding of your fresh fruit, sprinkle FMA over your fruit. The anti bacterial properties of Spirulina will delay the moulding of fresh fruit with hours. Fructivores birds are very apprehensive of gram positive bacteria, e.g. Staphylococcus aureus, as well as gram negative bacteria, e.g. Pseudomonas aeruginosa, Fungal spores, e.g. Aspergillus niger, Yeast, Moulds, e.g. Candida albicans. The added microscopic vegetable Spirulina platensis can add a variety of nutritional benefits to your bird's diet.

Analyses: Minerals o.a. potassium, sodium, calcium, magnesium, phosphor. Trace elements o.a.: copper, mangan, zinc, molybden, jod, fluor. Vitamins o.a. Vitamin A, D3, E, K1, B1, Vit. B6 Nicotinamide, Folic acid, Panthothenic acid, Vit. B12, Biotin. Amino acids o.a. L-Alanin, L-Arginin, L-Asparagin, L-Cystin, L-Glutamin, Glycin, L-Histidin, L-Isoleucine, L-Leucin, L-Methionin, L-Prolin, L-Phenylalanin, L-Serin, L-Threonin, L-Tryptophan, L-Tyrosin, L-Valin.

Dosage: By adding 2% FMA to the daily ration fruit the birds receive a sufficient amount of vitamins and minerals at a balanced ratio. Powder FMA over the fruit mass.

Available in: 400 gramme tub.
