

Meal-worm Feed substratum

Product: **Meal-worm Feed Substratum**

Product form: Powder

Avian Meal-worm feed substratum is specially developed to function as a nutrient medium for your mealworms, buffalo worms, Morio worms and crickets. It gives your feed animals an extra boost, elevating the nutritional value of your feed animals through the absorption of Avian Meal-worm feed substratum. It ensures that your feed animals receive a high degree of nutritional value. **Ingredients:** toasted soya, processed maize, grains, fishmeal, inactivated dried yeast, sugars, vegetable oils, animal fats, vitamins, minerals. The mealworm nutritional substrate contains little active yeast and fungal spores as a result of the applied production method that reduces the chance of the occurrence of food fermentation.

Ingrediënts: soya, maize, grain, fish-meal, inactivated dried yeast, sugars, vegetable oils, animal fats, vitamins and minerals.

Analyses:

Crude Protein	18.5 %	Crude Fat	6 %
