

# DK AQUATIC CARNIVORE GEL

## Complementary feed for carnivorous aquatic animals

This product is especially developed as a main diet for aquatic animals. It is designed to meet the nutritional requirements of carnivorous fish, turtles and terrapins. The product is a powder to which water should be added to form a gel.

### Features and Benefits of DK Zoological Aquatic Carnivore Gel

- \* High protein and fat level from high quality sources
- \* Contains insect meal as a sustainable protein source
- \* Designed to meet the requirements of carnivorous fish and turtles
- \* Developed in conjunction with specialised veterinarians and leading nutritionists
- \* Easy storage because of low moisture level, no freezer needed
- \* To create a diet for omnivorous fish: Combine with DK Aquatic Herbivore gel

### Preparation

1. Mix, by weight, 40% (cold) water to 60% powder. Adjust mixture to meet desired texture and need.
2. Mix thoroughly with a spoon, fork or whisk for one minute to meet the desired texture.
3. Knead the gel into the desired shape or smear on an object/stone.

### Feeding

The gel can be cutted into pieces and added to the water as is or in a 'feeding ball'. Another possibility is to smear the gel on an object when just prepared and put the object with gel in the water. Never feed more than the fish can eat in 30 minutes, this diet can be fed at a rate up to 50% of the animals' diet.

### Packaging & Storage advice

2 kg bag

This product should be stored in a cool dry place. Prepared product can be stored in the fridge for two days, or in the freezer for three months.

### Calculated Analysis (as is)

Moisture	%	10	Chlorine	%	1,0	Thiamin (B1)	ppm	180
Protein	%	50	Iron	ppm	450	Riboflavin (B2)	ppm	550
Fat	%	16	Zinc	ppm	200	Niacin (PP)	ppm	700
Fibre	%	2,0	Manganese	ppm	90	Pantothenic Acid	ppm	130
