

DK LARGE MAMMAL (PACHYDERM) BAR

Complementary feed for pachyderms as elephants, hippos and rhinos (no black rhinos)

Features and Benefits of DK Zoological Large Mammal (Pachyderm) Bar

- * Individual feeding allows the dosage to be accurately adjusted to the animal's needs
- * High concentrations of nutrients ensure that little feeding is required and thus the diet contains as much roughage as possible
- * Designed to add all necessary nutrients to a roughage-based diet
- * Contains all the vitamins and minerals required by Pachyderms
- * Contains flaxseed as a natural source of alpha-linolenic acid (omega 3 fatty acids)

Feeding Guide

1 bar (1 kg) = 6 slices

Adults: Provide 3 slices (500 g) per 1000 kg of bodyweight

Young animals (<1000 kg bodyweight): Provide 0,5 slice (83 gram) per 100 kg of bodyweight

For a more extended feeding advice, please see the second page of this datasheet

Product Form

20 bars of 1 kg per package

Calculated Analysis (as is)

		Minerals		Vitamins				
Moisture	%	10	Calcium	%	5,00	Vitamin A	IU/kg	70.000

						Ascorbic Acid	ppm	1000

Ingredients

Soybeanmeal feed, wheat middlings, linseed expeller, cane molasses, beet pulp dried, monocalcium phosphate, calcium carbonate, alfalfa, sunflower seed extracted, sodium chloride, maize, wheat flour, linseed, magnesium oxide, sodium bicarbonate, wheat.

General information

This product should be stored in a cool dry place.

Feeding advice

In the table below you can find the advised amount of DK Large Mammal Bar per day. 1 bar weighs 1 kg and contains 6 slices.

Bodyweight (kg)	DK Large Mammal per day
10 - 1000	3 slices (0,5 bar)
1000 - 2000	7 slices (1,1 bar)
2000 - 3000	8 slices (1,3 bar)
3000 - 4000	11 slices (1,8 bar)
4000 - 5000	14 slices (2,3 bar)
5000 - 6000	17 slices (2,8 bar)

These large mammals on average eat between 1-2% of their bodyweight daily, but please take into account that the actual intake depends on species, activity level, life stage and environmental influences. Please check the body condition of your animals regularly and adjust the diet if necessary.

Roughage is the most important part of the diet of large mammals like elephants, rhino's and hippo's. In the table below we give an overview of the amount of roughage we do advice per body weight category.

Bodyweight (kg)	Roughage (kg/day)
10 - 1000	10
1000 - 2000	21
2000 - 3000	24
3000 - 4000	33
4000 - 5000	43
5000 - 6000	52
