

# MAINTENANCE HI-FIBRE POWDER

Complementary feed for a variety primates with a high fibre requirement, such as: macaques, baboons, chimpanzees and bonobos.

## Features and Benefits of DK Zoological Maintenance Hi-Fibre Powder

- \* Comes as a powder, can be used for primates with dental issues or to mix with needed drugs
- \* High fibre content to simulate the natural diet
- \* Free of soy, palm oil and wheat gluten
- \* High amount of lucerne
- \* Designed to meet the NRC recommendations for non human primates
- \* Developed in conjunction with specialised veterinarians and leading nutritionists

## Feeding Guide

DK Maintenance Hi-Fibre is a complementary feed for primates with a high fibre requirement. This diet should be fed as 50% of the total dry matter intake (= 15% of the fresh diet if mostly fresh products are fed beside). The dietary requirements of the animal will depend on size, age, growth, activity, health and environmental temperature. The energy content of this product is 234 kcal/100 g.

To form a 'cake', add water in a ratio of 1:1 and let it soak (overnight). Additions such as drugs or other feed items can be mixed in.

## Product Form

Powder  
10 kg bag
