

## 4223 waterfowl floating pellet 30

complete floating pellet with high calcium content. For all waterfowl which eat on water. Also suitable for diving ducks and seaducks

### feeding advice

- feed the pellets preferably on land in a shallow bowl or feeder
- make sure all the waterfowl can peacefully eat and make several feeding sites if necessary
- feed preferably twice a day, to prevent the pellets from becoming moist and mouldy
- make sure all the waterfowl have access to clean water. If necessary, provide drinking bowls, separate from the pond water
- give year-round 816 waterfowl condition/show pellet as basic feed, and if the density of the plumage demands extra attention
