

1015 alfamix sheep

additional muesli for all sheep

feeding advice

- do not feed goat or cattle feed to sheep
- Garvo's feeding guidelines are an indication. For the amount of feed the animals need, consider their condition and the ambient temperature
- always give enough roughage
- during the summer, supplement with 200 g 1015 alfamix sheep per day in order to fulfil the minimal needs for minerals and vitamins
- give ewes, beginning from 6 weeks before breeding, some extra handfuls of 5073 sheep pellet basic (5mm) or 5071 sheep pellet. This contributes to optimal hormone housekeeping and better fertility
- supplement only during the first 12 weeks of gestation if the ambient temperature or too-little roughage supply require so
- after the first 12 weeks give some more concentrates
- build up gradually the amount of 1015 alfamix sheep or 5071 sheep pellet to a maximum of 1 kg per day and give unlimited hay
- give 5072 lambs pellet plus to lambs from about 2 weeks old on
- make sure there's always enough fresh water

Composition:

barleyflakes, barley, wheatflakes, maizeflakes, soya dehulled extracted toasted, wheat, beet pulp, apple molasses, soya dehulled extracted toasted, maize gluten feed, linseed expeller, palm kernel meal, soja oil, lecithin, lime stones, organic acids, genial oregano

Analytical constituents/kg

crude protein 14,8 %, crude fat 4,2 %, crude fiber 4,5 %, crude ash 7,1 %, calcium 12,43 g, phosphorus 4,33 g, sodium 3,24 g

Addition/kg Vitamins

3a672a Vitamin(e) A 8400 IE, 3a671 Vitamin(e) D3 2100 IE, 3a700 Vitamin(e) E 49 mg

Addition/kg Traces

zinc (3b607 Zn-chelate of glycine hydrate) 33 mg, zinc (3b603 Zn-oxide) 33 mg, manganese (3b506 Mn-chelate of glycine hydrate) 14 mg, manganese (3b502 Mn(II)-oxide) 14 mg, iron (3b103 Fe-sulphate, monohydrate) 16 mg, cobalt (3b304 coated granules cobalt(II)carbonate) 1 mg, molybdenum (E7 Po-molybdate) 2 mg, iodine (3b202 calcium iodate anhydrous) 1 mg, selenium (3b8.12 Se-organic CNCM 1-3399) 0.21 mg
