Additional feed for tapirs

Product description

Tapirs are browsers, which stands for
“leaf-eating herbivores”.

Tapirs naturally eat a variety of leaves, grasses, fruits and twigs. This feed choice is very varied. The gastrointestinal tract and food digestion can best be compared to that of a horse.

6008 tapir pellet grain free is an additional feed for tapirs. This pellet is given in addition to the daily amount of roughage and leaves. During the development of this pellet, the diet of tapirs in their natural habitat, the known nutritional needs of tapirs in the literature and the experiences of tapir owners and caregivers, were examined. All this bundled together has resulted in a balanced tapir feed for tapirs in all life stages.

The tapir pellet is completely **free from grains**. As a result, the feed contains a high content of crude fibre. In addition, extra vitamin E and biotin have been added to the composition. Vitamin E is a natural antioxidant that provides extra support to the immune system. Biotin is a vitamin that naturally supports the skin, coat and hooves. The tapir pellet also contains flaxseed fibres and flakes to support the digestion, skin and coat. The added vitamins and minerals specifically meet the need for tapirs.

This food, in combination with good care and housing, ensures an ideal condition of the animal.

Product features

- maintenance chunk (5mm) for tapirs
- suitable from young to old
- grain free
- with extra biotin and vitamin E.
- addition to daily roughage

note: always give unlimited roughage

Product in brief

100% grain free
(for a higher fibre content)

with extra biotin
(to support the skin, coat and hooves)

with extra vitamin E
(for natural support of the immune system)

Product information

product form: 5mm

best before: 365 days after the production date

net weight: 20kg

barcode: 8718164166693

animal group: parc and hobby animals

storage: keep cool, dry and dark (keep out of direct sunlight)

Feeding advice

- provide unlimited roughage and browse
- give daily about 1,0 kg tapir pellets per tapir
- provide small portions several times a day
- always provide enough fresh drinking water

Feed specifications*

Composition

dehydrated alfalfa meal, linseed fibres, palm kernel meal, timothy cobs, linseed expeller, peas yellow, beet pulp, cane molasses, lecithin

analytical constituents / kg		
crude protein	%	13,9
crude fat	%	4,5
crude fibre	%	23,5
crude ash	%	11,2
calcium	g	13,0
phosphorus	g	7,01
sodium	g	5,38
Addition / kg vitamins		
3a672a vitamin A	IU	16.820
3a671 vitamin D3	IU	1.682
3a300 vitamin C	mg	14
3a700 vitamin E	mg	1.009
3a890 vitaminB4 choline chloride	mg	80
3a316 vitamin B9 folic acid	mg	3
3a880 biotin	mcg	2.455
choline	mg	201

Addition / kg Traces		
copper (3b413 Cu-chelate of glycine hydrate)	mg	30
zinc (3b607 Zn-chelate of glycine hydrate)	mg	139
zinc (3b603 Zn-oxide)	mg	4
manganese (3b506 Mn-chelate of glycine hydrate)	mg	100
iron (3b108 Fe-chelate of glycine hydrate)	mg	32
iron (3b103 Fe-sulphate, monohydrate)	mg	60
cobalt (3b304 coated granules cobalt(II)carbonate)	mg	1
iodine (3b202 calcium iodate anhydrous)	mg	1
selenium (3b8.12 Se-organic CNCM 1-3399)	mg	0,29
selenium (3b801 sodium selenite)	mg	0,12
