feeding advice for rabbits (breeding and showing)

- give fresh straw and/or fibre-rich hay; these (raw) fibres are necessary for their digestion
- the feeding needs of rabbits is dependent on their activity, race size, whether they get supplements and their ambient temperature
- most rabbits daily eat 2.5 -3.5% of their body weight in feed
- prevent selective feeding habits by giving your rabbits only as much feed per day as they can eat
- give fresh water daily
