

# WISBROEK MICRO 40

## SUITABLE FOR:

Young fish-eating birds, such as waterfowl, grebes, terns and other sea and shore birds

Wisbroek Micro 40 is a complete (floating) daily food especially for young fish-eating birds, such as waterfowl, grebes, terns and other sea and shore birds. During the unique extrusion process, the high diversity of raw materials under high pressure to a delicious crunchy pellet formed. Each pellet contains all the nutrients your fish-eating bird needs to stay in good condition. Apart from the pellets, no extra additions are needed in the feed.

This balanced recipe contains a high fat and protein content to give growing birds enough energy to become big and strong. By adding a high percentage of fish meal and other high-quality animal protein sources, the protein content is no less than 40%. Especially for fast-growing young birds, our Micro 40 contains the ideal calcium/phosphorus ratio.

In addition to all these healthy nutrients, all the necessary vitamins, minerals and other essential nutrients are derived from animal and vegetable protein sources of only the highest quality. These ingredients help to support your bird's immune system.

We have coated our pellets with fish oil. As a result, the birds find it a very tasty meal.

## FEEDING ADVICE

Wisbroek Micro 40 can be given to young birds as needed. In the cold winter period, the birds will need more food, since in spring and summer there are more natural snacks such as insects, algae, buds and grass seeds for your birds.

It is important to watch for unnaturally rapid growth in young birds. This is characterized, among other things, by hanging wings or pitch wings. In this case, it is necessary to mix our Micro 40 with our less energy dense rearing feed Wisbroek Micro 22. It is also possible to switch completely to Wisbroek Micro 22 in case of signs of too rapid growth.

The pellets can be offered both dry and wet. Due to the extrusion process, the pellets have a water stability of approximately 48 hours. To make the pellets softer and easier to eat, you can soak them in water. Our advice is to use a ratio of pellets : water of 1 : 2.

## ANALYTICAL CONSTITUENTS

Crude protein	40%
Crude fat	10%

HIGH  
DIVERSITY

NATURAL  
INGREDIENTS

GMO  
FREE

Store in a cool, dry and dark place

Make sure the bird always has fresh water available.

Not suitable for human consumption, for animals only.
