

# WISBROEK TANGARA NECTAR

## SUITABLE FOR:

Wisbroek Tangara Nectar is a supplementary feed for nectar-eating birds, such as Tangaras, Sugarbirds, Honeycreepers, White-eyes and Leafbirds.

Wisbroek Tangara Nectar is a supplementary feed for nectar-eating birds.

## HOW DOES IT WORK?

With Wisbroek Tangara Nectar, birds get the natural nutrients they normally find in the wild as well. These are nutrients such as vitamins, minerals, amino acids, trace elements, carbohydrates, proteins and fats.

The added spirulina in the nectar prevents spoilage on the one hand, while on the other hand it is a natural colouring agent for the birds. This enhances their beautiful natural colours.

Order direct from our website

## ADVICE FOR USE

Mix 10 grams (1 full measuring spoon) Wisbroek Tangara Nectar with 100 ml of water.

Provide fresh Wisbroek Tangara Nectar daily.  
Prepared nectar can be kept for 12 hours.
