

WISBROEK CRANE DIET

SUITED FOR:

Cranes, rails and screamers

Wisbroek Crane Diet is a complete daily food for cranes, rails and screamers. During the unique extrusion process, the high diversity of raw materials is formed under high pressure into deliciously crunchy pellets. Each pellet contains all the nutrients your bird needs to stay in good condition. Apart from the pellets, no extra additions are needed in the feed.

This balanced recipe contains organic nutrients that ensure optimal digestion. The many fibers in our Crane Diet contribute to a healthy intestinal flora. In addition, all the necessary fatty acids, amino acids, vitamins, minerals and other essential nutrients come from the highest quality animal and vegetable protein sources. These ingredients help to support your bird's immune system.

Since several species of cranes naturally eat fish, Wisbroek Crane Diet also contains fish and shrimp meal.

Order direct from
our website

FEEDING ADVICE

Cranes, rails and screamers will never eat more than they need. This means that our Crane Diet can be fed without restriction. The pellet recipe is formulated in such a way that the birds always get enough nutrients. It is possible that the birds will eat less pellets in the spring and summer. This is because there are more insects and other natural snacks available to them during this period.

It is important for screamers that, in addition to our pellets, they also have access to fresh grasses, green fodder (e.g. endive) and/or (water) plants.

ANALYTICAL CONSTITUENTS

Crude protein	18%
Crude fat	5%

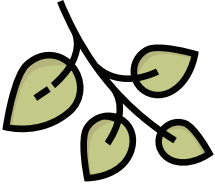

Store in a cool, dry
and dark place

Make sure the bird always
has fresh water available.

Not suitable for human
consumption, for animals only.
