

ZOO-LINE

High fiber pellets.

Pellets as browse for savanna animals.

Our high fiber pellets, is browse without any artificial additive's soya, palm oil, and aromas. The pellets is therefore a completely natural and healthy product. The pellets contains branches that are collected in the spring when they have set their first bud shoots. The branches are then dried and put in to stock for later grinding in to a pellet that contain small and large fibers. This way the stomach have something to work with and it take longer time for the feed to pass through the animals digestive system.

This feed have the effect that you use les feed pr kg animal because the animal will obtain/use more of the feed in their digestive system.
