

DRIED BROWSE MULCH

Complementary feed for browse and leaf-eating animals like giraffes, okapi's and a variety of primates

Features and Benefits of DK Zoological Dried Browse Mulch

- * Easy solution to feed browse all year
- * Quickly dried to preserve all nutrients
- * Contains Prebichel® – a 100% natural acacia plant fibre. It contains prebiotics and active fibres that help maintain and improve an animal's microbes in the gut.
- * Packed in 20 kg compact bales
- * No preservatives used
- * Low amount of melasse and glycerin added to preserve leaves and prevent dust

Feeding Guide

Can be fed ad libitum or as the usual portion of browse in the diet. Ideally fed in a way that challenges the animal and increases the feeding time. For example using a feeder with a grid on top of it, to make it harder to reach the food and encourage the animal to perform natural behavior using the tongue.

It is also possible to mix the pellets that are part of the diet of the animal with the dried browse mulch. This will increase feeding time, which can have a positive effect on digestion and nutrient availability.

Product Form

Mulch, freshly chopped and dried, including branches and leaves
20 kg bale

Analysis of Dry Matter*

Protein	%	10,3
Fat	%	1,1
Fibre	%	39,0
NDF (Neutral Detergent Fiber)	%	56,7
ADF (Acid Detergent Fiber)	%	44,3
ADL (Acid Detergent Lignine)	%	9,9
Ash	%	8,5
Calcium	%	1,29
Phosphorus	%	0,17
